

20 June 2016

Dear Parents / Carers

End of Year test – Science

To help us gain a more comprehensive insight into the progress the pupils at MESIR have made this year in science we will be undertaking an end of year test within classes during the week commencing 27 June.

We suggest that the pupils should spend some time looking at their tests, improvements and work books they have used throughout the year. Some revision may also be taking place within the classroom.

Attached below is are the topics we have covered as part of this end of year test

Cells
Variation and Classification
Acids and Bases
Forces and Motion
Particles and Matter
Space

Here are some suggested resources to help the students revise.

CGP KS3 Science

BBC Bitesize KS3 Science
